

Cover letter

Dear Tetiana

I am writing this cover letter to express my interest in the position of a C++ developer in a QLOC company. I learned about your company through a LinkedIn advertisement and after studying your site, I have come to the conclusion that not only do my skills match your requirements, but also that I am very interested in the work you do and the challenges you meet along the way. Also, I think that your company can be a great career start for me.

I am currently studying at the Ukrainian National university “Zaporizhzhia polytechnic” majoring in software engineering, and I believe that I have enough skills to apply for the mentioned position.

Even though I still haven't graduated from university I feel suitable for this position because I already have many of the required skills that you could see on my resume, such as knowledge of C++ and C#, OpenGL and other graphics APIs. Also I have experience with web languages such as HTML, CSS and JS.

As an addition, I have a decent knowledge of sound-design/sound-engineering which I acquired while making music. Stepping away from tech skills, I should mention that I am a native speaker of both Russian and Ukrainian and I am fluent in English.

I consider myself to be a friendly, enthusiastic and responsible worker that can efficiently combine creative and tech efforts to reach the best possible result, and I believe that I would be an excellent candidate for this position.

Thank you for taking time to consider my application. If you need, you can find my contacts in the CV.

Sincerely yours,
Danil Dedov
